# GTI-MINI DIE CUTTER DC-1410 PROCUT

DIGITAL FINISHING & CONVERTING SYSTEM AUTO REGISTRATION
DIE CUTTING SLITTING & LAMINATOR

Gruptech's DC-1410-PROCUT Digital Label Finishing Systems are the perfect semi rotary, auto registering label creating machine. Finish your high quality prime labels including: jewelry labels, hang tags, door hangers, wrist bands, CD and DVD labels, multi sized labels, parking hang tags, kids stickers, security labels, void labels, multi level labels, magnets nursery tags, by fold cartons, multi part bumper stickers, garment tags, coupons, food, wine and beverage labels.

Set up and operation is fast and easy. Simply:

1. Mount your pre printed roll of media
2. Feed media through DC-1410 small footprint
3. Mount magnetic flexible plate
4. Enter label description into DC-1410 touch screen
5. Apply laminate
6. Remove waste matrix between labels
7. Slit to individual roll labels Begin producing high quality digital labels

Gruptech

DIE CUTTER DC-1410 PROCUT SPECIFICATIONS

- Digital Control Panel (touch screen) basic included
- Standard Max Web Width: 10" Standard Minimum Web Width: 1" Standard Maximum Die Cutting Width: 10"
- Standard Minimum Die Cutting Width: Depends upon flex die layout
- Standard Maximum Die Cutting Length: 15"
- Standard Maximum Operating Speed:
  1.- Variable 0 – 30 FPM for laminating and die cutting pre-printed media with registration marks
  2.- Variable 0-100 FPM for white labels
- Standard Operating Voltage: 115V 60 Hz single phase power
- Standard Unwind Stand: for 14" roll with manual braked unwind tension
- Standard Waste Matrix Rewind: For 14" roll
- Standard Finished Product Rewind: For 14"

The DIE CUTTER DC-1410-PROCUT provides the capability to auto-register, is equipped with servo technology, and is a modular rotary and laminating die-cutting machine. All of which; makes finishing digital printed labels easy and cost effective.

This press is designed to take pre-printed material and automatically position the rotary die and cut material in registration with the printed images to be finished quickly and economically. The standard DIE CUTTER DC-1410-PROCUT operates with a non-removable magnetic rotary die-cutting cylinder and utilizes economical flex dies. This modular machine as designed, allows for various options to meet the final product requirements. The DIE CUTTER DC-1410-PROCUT offers great performance often found in much larger and more expensive finishing systems. With this piece of equipment, label finishing and lamination doesn't get any easier.

The DIE CUTTER DM-1410-PROCUT is the perfect finishing and laminating machine for finishing digitally preprinted webs from the Digital printer from Colordyne, Model 1600 "C" with Memjet Tecnology.
